

Welcome to our Home **and Neighborhood**

This home has given us wonderful memories and great neighbors who are both quiet and very friendly. We have loved sitting in the living room in the morning as the sun comes up through the wall of windows or watching the evening sun paint Bear Mtn. in pastel hues. There are several nice walks and hikes very close by including a short one mile walk to Mirror Lake.

The large deck with the hot tub has been a great gathering place for friends and family year round. Cozy winter weekends were spent in front of either of the two wood-burning fireplaces playing games with friends and neighbors or just reading a good book.

The many trees on the property offer a feeling of seclusion and privacy, making time spent outside during the spring, summer, and fall feel like being in your own little world.

Whether grilling on the deck or roasting smores on the firepit patio - there is always something to enjoy without leaving the comfort of home. We have enjoyed living in this home for the past almost five years but, because of a change in our home needs, we are sadly forced to move.
