

Welcome to our Home **and Neighborhood**

Things we loved about living at 20910 Country View:

It's truly a home for all seasons!

Spring: the expansive mountain views before the leaves bud out; sitting in the house watching the annual spring greening as it went from brown to green in about two days, fiddlehead ferns slowly unfolding in the rapidly increasing sunlight, the rhubarb plant by the side of the house that will be ready by mid-June.

Summer: Neighborhood pizza parties. Easy access to Bear Mountain hiking trails and Mirror Lake for kayaking. Watching eagles soar and sometimes sit in the trees. The house still smelling like cedar when you return home from an extended trip.

Fall: Long, slow sunsets over the inlet that last for hours. The huge range of mountains visible in the lingering twilight, Mt. Redoubt to Denali. Moose and squirrel, and occasional other furry critters (lynx, bears) appearing in the woods near the house.

Winter: Annual Christmas broomball on the lake with friends and family. Your own 100 acre woods for the kids to play in. Phenomenal aurora viewing AND the neighbors will call and tell you to go outside and see; they will expect you to do likewise.

And finally, not once have we had to paint the walls! (At least upstairs!)
