Attention: Mr. Joseph Cuccio, Committee Chairperson

Reference: ***Subsurface Soil Remediation Completion Report  
Heather Walk Building 16  
7401, 7403, 7405, 7407 Heather Walk Drive  
Weeki Wachee, Florida 34613  
Universal Project No. 0830.1300457.0000***

Dear Mr. Cuccio:

As authorized, Universal Engineering Sciences, Inc. (Universal) observed the subsurface grouting operations at Heather Walk Building 16, performed by SRS Services LLC. The purpose of the grouting operation was to treat the encountered sinkhole conditions within the footprint of the building by filling any voids that may be present near the limestone / soil interface as well as displacing soft, subsurface deposits that may be present near this interface and in the overburden soils.

Universal completed a peer review of a geotechnical report generated for Heather Walk Building 16 prepared by Central Florida Testing Laboratories, Inc. (CFTL) dated August 5, 2010. After reviewing the report prepared by CFTL, Universal concurred with the opinion that commonly associated indicators of sinkhole activity were identified. Universal completed a site inspection and confirmation of site conditions of the building in order to provide our stabilization recommendations. Our findings were presented in a report dated October 25, 2014 (Universal Project No. 0830.1300457.0000).

The grouting operations were conducted between January 24, 2014 and February 17, 2014. A total of fifty-seven (57) grout injection points (GIPs) were completed for the grouting operations. Fifty-nine (59) GIPs were called for on the original Grout Injection Point Location Plan; however, GIP Numbers 4 and 30 were later deleted from the plan due to onsite obstructions. The approximate location of each grout injection point is presented in the attached Grout Injection Point Location Plan (**Attachment A**). The GIP installation depths varied from 55 to 74 feet with an average installation depth of approximately 64 feet.

The rotary wash method was used to install the grout injection points. A sand, water, cement, and fly-ash grout mixture was pumped through 3 inch steel pipe at selected depths. The structure and ground surface in the vicinity of injection points were monitored for any uplift during the grouting operation by SRS Services LLC. Upon initial pumping at the maximum depth of each grout injection point, the pipe was raised in approximately 5 foot increments once pumping criteria (set forth in the site specific grout recommendations) were met.

**A total of 450 cubic yards of grout was delivered onsite. 450 cubic yards were used for the grouting operations and no grout was returned throughout the project. The average volume of grout injected into each GIP was 7.9 cubic yards.**

The amount of grout injected at each grout injection point is presented in the following table:

Grout Injection Point	Date Completed	Max Casing Length (feet)	Grout Pumped (cy)
1	February 17, 2014	74	16.0

59	February 5, 2014	61	5.8
<b>PROJECT TOTAL</b>		<b>3672</b>	<b>450.0</b>
<b>Total Grout Delivered (cy):</b>			<b>450.0</b>
<b>Total Grout Sent Back (cy):</b>			<b>0.0</b>

The actual quantity for drilling and grouting compared the quantity estimated for the project from the geotechnical investigation is summarized in the table below:

	Estimated Quantity	Actual Quantity
Drilling	3,835 feet	3,672 feet
Grouting	550 cy	450 cy

During the project, no situations were encountered which resulted in lost casing and drill heads being lost in the borehole that were not feasible to recover. Additionally, no re-drills were required during this stabilization project.

March 14, 2014

Minor damages including minor cracking and further aggravation of existing damages are typically experienced and an unpreventable part of the stabilization process. During the stabilization project, no additional damages were noted as potentially caused by the stabilization activities.

Based on our observation of the grouting program performed at the Heather Walk Building 16, and subsequent analysis of data gathered during the grouting, we feel that the intent of the remedial grouting was met. The low-slump grouting program performed by SRS Services LLC was completed in substantial accordance with local practices for the improvement and stabilization of subsurface soils beneath the residence to remediate potential sinkhole activity.

We note that measures such as subsurface grouting are intended to treat, in a practical and cost-effective manner, potentially detrimental sinkhole conditions which could affect the structure during its remaining useful life. However, evaluation of the effectiveness of treatment is subject to inference and interpretation of the end result, and cannot be predicted with certainty. This report certifies that the work completed was in accordance with the engineering recommendation of Universal Engineering Sciences, Inc.

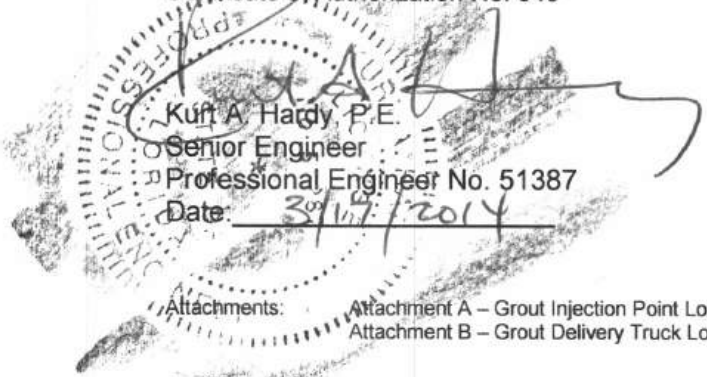

Universal recommends that cosmetic repair shall not begin prior to April 18, 2014. This 60-day waiting period will allow the grout to substantially cure and the grout / soil matrix to stabilize.

If you have any questions regarding this report or when we can be of further assistance please contact the undersigned at (813) 740-8506.

Respectfully submitted,

**UNIVERSAL ENGINEERING SCIENCES, INC.**

## CAUTION

May cause eye or skin injury. Contains Portland Cement. Freshly mixed cement, mortar, concrete, or grout may cause skin injury. TAKE THESE PRECAUTIONS:

1. Avoid all contact with eyes.
2. Wear rubber boots and gloves, and avoid prolonged contact directly with skin or through porous materials.
3. In case of contact with skin or eyes, FLUSH THOROUGHLY WITH WATER.
4. If irritation persists, get medical attention promptly.
5. Keep children away.

## UNLOADING

Drivers are prohibited from delivering concrete except under the truck's own power, and where site conditions permit the safe and proper operation of their equipment. Drivers are not permitted to add water to the mix to exceed the maximum slump nor to drive beyond the curb line, except upon the authorization of the customer and his acceptance of the risk for any loss or damage.

## CAUTION

May cause eye or skin injury. Contains Portland Cement. Freshly mixed cement, mortar, concrete, or grout may cause skin injury. TAKE THESE PRECAUTIONS:

1. Avoid all contact with eyes.
2. Wear rubber boots and gloves, and avoid prolonged contact directly with skin or through porous materials.
3. In case of contact with skin or eyes, FLUSH THOROUGHLY WITH WATER.
4. If irritation persists, get medical attention promptly.
5. Keep children away.

## UNLOADING

Drivers are prohibited from delivering concrete except under the truck's own power, and where site conditions permit the safe and proper operation of their equipment. Drivers are not permitted to add water to the mix to exceed the maximum slump nor to drive beyond the curb line, except upon the authorization of the customer and his acceptance of the risk for any loss or damage.

## CAUTION

May cause eye or skin injury. Contains Portland Cement. Freshly mixed cement, mortar, concrete, or grout may cause skin injury. TAKE THESE PRECAUTIONS:

1. Avoid all contact with eyes.
2. Wear rubber boots and gloves, and avoid prolonged contact directly with skin or through porous materials.
3. In case of contact with skin or eyes, FLUSH THOROUGHLY WITH WATER.
4. If irritation persists, get medical attention promptly.
5. Keep children away.

## UNLOADING

Drivers are prohibited from delivering concrete except under the truck's own power, and where site conditions permit the safe and proper operation of their equipment. Drivers are not permitted to add water to the mix to exceed the maximum slump nor to drive beyond the curb line, except upon the authorization of the customer and his acceptance of the risk for any loss or damage.

May cause eye or skin injury. Contains Portland Cement. Freshly mixed cement, mortar, concrete, or grout may cause skin injury. TAKE THESE PRECAUTIONS:

1. Avoid all contact with eyes.
2. Wear rubber boots and gloves, and avoid prolonged contact directly with skin or through porous materials.
3. In case of contact with skin or eyes, FLUSH THOROUGHLY WITH WATER.
4. If irritation persists, get medical attention promptly.
5. Keep children away.

## UNLOADING

Drivers are prohibited from delivering concrete except under the truck's own power, and where site conditions permit the safe and proper operation of their equipment. Drivers are not permitted to add water to the mix to exceed the maximum slump nor to drive beyond the curb line, except upon the authorization of the customer and his acceptance of the risk for any loss or damage.

## CAUTION

May cause eye or skin injury. Contains Portland Cement. Freshly mixed cement, mortar, concrete, or grout may cause skin injury.

### TAKE THESE PRECAUTIONS:

1. Avoid all contact with eyes.
2. Wear rubber boots and gloves, and avoid prolonged contact directly with skin or through porous materials.
3. In case of contact with skin or eyes, FLUSH THOROUGHLY WITH WATER.
4. If irritation persists, get medical attention promptly.
5. Keep children away.

## UNLOADING

Drivers are prohibited from delivering concrete except under the truck's own power, and where site conditions permit the safe and proper operation of their equipment. Drivers are not permitted to add water to the mix to exceed the maximum slump nor to drive beyond the curb line, except upon the authorization of the customer and his acceptance of the risk for any loss or damage.

Water added:

Gallons
