

Seller's Property Disclosure – Residential

Notice to Licensee and Seller: Only the Seller should fill out this form.

Notice to Seller: Florida law¹ requires a **Seller** of a home to disclose to the **Buyer** all known facts that materially affect the value of the property being sold and that are not readily observable or known by the **Buyer**. This disclosure form is designed to help you comply with the law. However, this disclosure form may not address every significant issue that is unique to the Property. You should think about what you would want to know if you were buying the Property today; and if you need more space for additional information, comments, or explanations, check the Paragraph 12 checkbox and attach an addendum.

Notice to Buyer: The following representations are made by **Seller** and **not** by any real estate licensee. This disclosure is not a guaranty or warranty of any kind. It is not a substitute for any inspections, warranties, or professional advice you may wish to obtain. It is not a substitute for your own personal judgment and common sense. The following information is based only upon **Seller's** actual knowledge of the Property's condition. **Sellers** can disclose only what they actually know. **Seller** may not know about all material or significant items. You should have an independent, professional home inspection to verify the condition of the Property and determine the cost of repairs, if any. This disclosure is not a contract and is not intended to be a part of any contract for sale and purchase.

Seller makes the following disclosure regarding the property described as: 5201 NEFF LAKE ROAD, BROOKSVILLE, FL
34601 (the "Property")

The Property is owner occupied tenant occupied unoccupied (If unoccupied, how long has it been since **Seller** occupied the Property? 1 days)

Digital Signature Verification Report

Process and Intent Verification

The appFiles digital signature platform provides for two types of digital signatures each with their own type of authentication. The purpose of this report is to provide the parties of the documents listed below with the proof of intent and verification information collected at the time of digital signature.

The first type of digital signature is an in-person digital signature which is administered in the presence of personnel experienced with the collection of digital signatures. For this style of signature we record not only the required verification information consisting of the signature ID, device IP address and timestamp that the signature was collected but also the name of the experienced digital signature administrator who personally observed and explained the digital signature process to the client.

The second type of digital signature is a send-away digital signature. In this type of signature, the digital signature administrator prepares a set of documents to be sent and signed on the client's own computer or mobile device. During the process of preparing the package of documents, the administrator assigns a role to the client and places/activates the correct signature and initial locations on the document for that individual. A link is then generated and emailed that is unique to that individual that will begin the review and digital signature process.

Due to the nature of the send-away signatures being remotely administered, the signer, upon receiving and opening the link to the document package, must agree to the digital signature terms and conditions that indicate that they have read and reviewed the documents before signing and that they further agree that their digital signature will be as legally binding as a physical pen and paper signature. Once they have agreed to these terms and conditions, the signature request system will guide them through the process of reviewing each page of the document package before initialing or signing. For this type of digital signature, the verification information consisting of signature ID, device IP address and timestamp is collected as the signatures and initials are completed.
